Not intended for pregnant or lactating women. As with all nutritional products, consult your physician before using this product if you are taking medications. KEEP OUT OF REACH OF CHILDREN.

Carbohydrates, including sugars, have always been a primary fuel for human life. However, over the years, food processing has dramatically altered the amount and type of carbohydrate in our diet. As a result, blood sugar metabolism has become a problem for millions of people in North America.

In addition to a healthy diet and regular exercise, research has shown that certain nutrients can help support healthy blood sugar levels in adults. Univera's Level G™ complex features highly bioavailable chelates of chromium and vanadium, essential trace minerals shown to promote healthy glucose metabolism. Level G also contains extracts from the banaba plant, known to support healthy blood sugar metabolism as well as antioxidant protection.

Unique to Level G is the addition of a proprietary Aloe vera complex, shown in recent studies to provide significant support for maintaining healthy blood sugar levels. Level G represents the latest breakthrough in metabolic maintenance in one convenient formula that includes today's most effective botanical and trace mineral compounds.\*

- ▶ Helps maintain normal glucose levels\*
- ▶ Provides antioxidant protection\*
